

# SUB 100V

## PASSIVE SUBWOOFER WITH BUILT-IN 100 V LINE TRANSFORMER

The SUB 100 V is an enhanced passive subwoofer featuring a ported wooden cabinet and an internal crossover for improved midrange slope and overall frequency balance. It includes a 6" woofer, a built-in low-pass filter, and a high-quality 100 V line transformer with selectable power inputs. A new acoustic grille fabric improves both acoustic transparency and visual appeal. Designed for surface mounting on walls or ceilings, the SUB 100 V also supports low-impedance input, providing flexibility in commercial background music systems. It delivers significantly improved low-frequency extension in distributed audio setups.
